## Experience

---

### Accenture India, Hyderabad

Security Delivery Analyst

Oct 2021 – Currently Working

#### Responsibilities:

- Identify Compliance Risks and remediates them with standard organization's procedures.
- Experience in IT security, compliance and risk management, including privacy, controls, etc.
- Protect client's data by effectively enforcing IT General Controls (ITGC).
- Ensures the effective implementation of ISMS (Information Security Management Systems – ISO27001) for the internal / external clients tagged with our engagement.
- Perform Assessments, Internal Audits on identified controls (from different control categories) and remediating the identified gaps to ensure timely compliance.
- Ensures the Application Security by interpreting various (SAST, DAST, etc.) scan reports, categorizing risk by critical, high, medium and low and remediating the identified gaps with proper timelines.
- Apart from our 11 Engagement-level Internal Client Accounts, handled two External Client Accounts and acted as an SPoC for all the Security related Activities and making the Application Team adhering to the Compliance.
- Ensures Applications are Security Cleared and then hosted publicly by assessing the risks from applicable scans.
- Predominant Focus – Secure Application Development, Vulnerability Management, Administrator Access, Least Privilege Access, Segregation of Duties, User Access Management, Transmission of Data, Reuse of Work Products, Patching, Storage and Encryption of Data, BCP & DR.

### Tata Consultancy Services Ltd., Chennai

Developer FS - Banking

November, 2020 – July, 2021

#### Responsibilities:

- Worked in financial-specific feature development and security delivery and maintenance
- Trained as a Full-stack Developer to develop features based on the CRs raised by Banking Team.
- Worked on dev, stage & prod instances to ensure the feature is impeccable.
- Ensuring Risk Control Self Assessments (RCSA) are at place to bring the compliance over existing features.
- Worked with Unix commands to run & debug the existing features.
- Performing Root Cause Analysis (RCA), Corrective & Preventive Action (CAPA) for the deployed features.

## Projects

---

- **Title** : **ATTENDANCE AUTOMATION PORTAL**
  - **Duration** : 17 Dec'18 - 18 Dec'18 (A product developed for college management)
  - **Server Side** : PHP, Xampp
  - **Front End** : HTML, JS, CSS
  - **Back End** : MySQL, phpmyadmin
  - **GitHub Link** : <https://github.com/anudeepdumpala/INT-ELLIGENCE>
  - **Description** : This project automates the process of on slip attendance, auto updating attendance in GCC, also informs the respective parents on the student's absence to class, if any, through a mail and an SMS.
- 
- **Title** : **DEVELOPMENT OF E-PORTAL FOR TEXTILE MARKETING**
  - **Duration** : 2 Mar'19 - 3 Mar'19 (Under Ministry of Textiles, GOI)
  - **Technologies** : PHP, Open-cart modules
  - **Description** : This is a project developed in Smart India Hackathon 2019 which is a statement proposed by ministry of textiles. This project brings the producers & consumers to a single platform which is a B – C platform. So, both artisans, as well as consumers, get profited. Also, the category of the products is restricted to sell from their areas of origin so that the uniqueness of all those textiles and looms will not be drained as well as copy right are protected.
